MHC protein complex assembly

antigen processing and presentation of exogenous peptide antigen via MHC class II peptide antigen assembly with MHC protein complex

antigen processing and presentation of exogenous peptide antigen

antigen processing and presentation of exogenous antigen antigen processing and presentation of peptide or polysaccharide antigen via MHC class II

antigen processing and presentation of peptide antigen and presentation of peptide antigen via MHC class II

antigen processing and presentation number of genes 50 asymmetric synapse 100 150 immune receptor activity 200 postsynaptic density neuron to neuron synapse p.adjust 1e-10 phagocytosis

adaptive immune response

immunoglobulin mediated immune response

leukocyte medinังอู้ใดเดิง cell ใช้ช่างation involved in immune response lymphocyte mediated immunity

cell killing
